

CELT DECISION MAKER

Launched at the New York Toy Fair February 2020

| | |
|---|-------------------------------|
| CELT DECISION MAKER by Sirius Enigmas #245 | |
| DATE: **DECEMBER 5, 1981 | MOTION TYPE: PHYSICS |
| SPECS: YOU SPIN ME RIGHT ROUND | STATUS: Making Physics Happen |
| DESCRIPTION: The celt, also known as a "rattleback," has a complex motion. If it is spun, it will rotate for only a few turns, then stop, rattle up and down, and then turn around and rotate in the opposite direction. The physics of its motion has been studied for over a century. The motion is unpredictable, just like my moves on the dance floor. | |

Because the world revolves around you...

CALL OUT fig. A-1
The Celt is also known as the rattleback, the wobblestone and, occasionally, as "Tate's Compass" as in "He who has a Tate's is lost."

I wonder how far I could make it in the corporate world by only using this decision maker?
